

EUROPEAN NURSES AND MIDWIVES AGAINST TOBACCO

FIRST NETWORK CONFERENCE IN STOCKHOLM MARCH 2000

All 15 EU member states, plus Iceland and Norway, was invited to the conference.

The aim was to build a strong network between all EU-member states and associated countries to strengthen and enhance the role of nurses and midwives working on tobacco control issues. The key-persons will form the basis of a core group who is co-ordinating all future pan European tobacco control activities by nurses and midwives.

The future collaboration of network will ensure that the profile of nurses and midwives working on tobacco control will be recognised and their professionalism enhanced.

FINANCED WITH THE
ASSISTANCE OF THE
EUROPEAN COMMUNITY

TIME TO ACT

Nurses, midwives and medical laboratory technologists work close to health service patients and furthermore, preventive care and saving lives is a part of their professional code.

The aim of this policy declaration is to point the direction for the Association's work in reducing smoking.

Constant dripping hollows the stone - and many drops are required to reach the vision of children and adolescents and a society free from smoking.
